SUMMARY

Results-driven **Data Analyst** with hands-on experience in **SQL, Python, Power BI, Excel, and AWS** (S3, Glue, Athena, DataBrew, ETL), specializing in transforming raw manufacturing and operational data into actionable business insights. Skilled in building end-to-end **analytics pipelines, interactive dashboards, and predictive models** with a proven track record of writing **20+ SQL queries** per project, analyzing **20,000+ record datasets**, and deploying **KPI dashboards** adopted in production environments. Strong engineering foundation (CGPA: **8.90/10**) with an international research publication and national-level award-winning projects. Actively seeking roles in **Data Analytics, Data Science, or Data Engineering**.

TECHNICAL SKILLS

Languages & Query: Python (Pandas, NumPy, Matplotlib, Seaborn), **SQL** (MySQL, PostgreSQL), C++

Data & BI Tools: Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Dashboards), **Jupyter Notebook**

Cloud AWS: Amazon S3, AWS Glue, Amazon Athena, AWS DataBrew, **ETL Visual Editor**

Analytics Skills: Exploratory Data Analysis (EDA), Data Cleaning & Wrangling, Statistical Analysis, **KPI Development**, Trend Analysis, Correlation Analysis, **Anomaly Detection**, Predictive Analytics

Tools & Platforms: Git & GitHub, VS Code, Google Colab

Soft Skills: Analytical Thinking, Problem-Solving, Cross-functional Collaboration, Data Storytelling

EXPERIENCE

Data Analyst

Autoline Industries Ltd

Jun 2026 – Present

Pune, Maharashtra

- Analyze **machine sensor data** (temperature, vibration, pressure) from **2 production lines** to monitor equipment health and detect operational anomalies in real time, reducing manual inspection time by **30%**.
- Build and maintain **5+ Power BI dashboards** tracking KPIs including machine uptime, **OEE (Overall Equipment Effectiveness)**, cycle time deviations, and downtime patterns for daily operations review.
- Write **15+ complex SQL queries** to extract, transform, and aggregate manufacturing data from relational databases, cutting ad-hoc reporting turnaround from days to **under 2 hours**.
- Develop **Python-based** (Pandas, NumPy) predictive maintenance models identifying early failure signals in sensor trends, enabling proactive intervention before unplanned stoppages.
- Clean and preprocess **raw industrial datasets** (M2, M35 machines) — handling missing values, outliers, and type inconsistencies — ensuring **100% data integrity** for downstream analytics pipelines.

Project Management Intern

Lumax Cornaglia Auto Technologies Pvt. Ltd.

Jan 2026 – Feb 2026

Pune, Maharashtra

- Tracked and reported project milestones across **3+ manufacturing workflows** using **Excel dashboards**, monitoring schedules and resource utilization for **on-time delivery**.
- Collected and structured operational data from cross-functional teams to prepare **weekly progress reports** and status summaries reviewed by plant management.
- Assisted in identifying **2 key production bottlenecks** through data observation and stakeholder interviews, contributing to process improvement documentation.

PROJECTS

Machine Monitoring Analytics Dashboard | **SQL, Power BI, Excel, Python**

- Processed **real industrial sensor datasets** (M2 & M35 machines) covering temperature, vibration, and pressure delivering **end-to-end manufacturing analytics** across **2 machine types** from raw data to insight.
- Built **multi-page Power BI dashboards** with KPI cards, time-series trends, and anomaly flags; wrote **10+ optimized SQL queries** for **OEE metrics** and shift-level performance comparisons.
- Performed **Python-based** statistical analysis (correlation matrices, rolling averages, anomaly detection) converting sensor patterns into **actionable maintenance recommendations**.
- Outcome:** Dashboard adopted for production monitoring; reduced manual reporting effort by **~40%** and uncovered previously undetected equipment degradation patterns.

Airbnb NYC — Python EDA & Market Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Executed end-to-end **EDA** on **20,770 Airbnb NYC listings** across **22 attributes** — data quality checks, missing value handling, outlier removal, and type validation ensuring full analytical integrity.
- Uncovered Manhattan’s price premium; beds–price correlation **$r \approx 0.42$** ; reviews correlation **$r \approx 0.63$** — all derived through statistical analysis using **Pandas** and **Seaborn**.
- Produced **15+ visualizations** (heatmaps, pair plots, scatter maps, distribution charts) communicating pricing patterns, geographical concentration, and listing availability trends.

Zepto SQL Inventory & E-commerce Analytics | *Power BI, Postgre SQL, Excel*

- Built a comprehensive **SQL analytics project** on Zepto’s product/inventory dataset, analyzing pricing structures, discount patterns, stock availability, and category-level performance.
- Wrote **20+ SQL queries** using GROUP BY, CASE WHEN, subqueries, aggregate functions — answering **15+ business intelligence questions** from raw e-commerce data.
- Identified **high-discount SKUs**, out-of-stock patterns across **multiple categories**, and revenue-impacting inventory gaps; delivered data-backed restocking recommendations in **Excel KPI report**.

EDUCATION

B.E. Robotics & Automation <i>CGPA: 8.90/10</i>	Jun 2022 - May 2026
<i>D Y Patil College of Engineering</i>	<i>Akurdi, Pune</i>

CERTIFICATIONS

Data Analytics Job Simulation	2025
--------------------------------------	------

Deloitte - Forage Virtual Internship Platform

- Completed simulation covering **data analysis**, forensic technology, and **business insight generation** using real-world datasets and analytical frameworks used by Deloitte consultants.

Prompt Engineering for Generative AI	2024
---	------

IBM - Online Certification

- Gained proficiency in **LLM prompt design**, few-shot learning, prompt chaining, and applying **Generative AI** in data and analytics workflows.

PUBLICATIONS

Smart Abrasive Monitoring System (SAMS) — IoT-Based Predictive Maintenance	
---	---

International Conference on Cybertech and Smart Systems

- Published research on an ESP32-based IoT system using **sensor data analytics** (ADXL335 vibration + MLX90614 temperature) for real-time abrasive tool health monitoring.
- Implemented **ML-based anomaly detection** to predict tool wear and trigger maintenance alerts, demonstrating measurable reduction in unplanned downtime in lab conditions.

ACHIEVEMENTS & EXTRACURRICULARS

1st Runner-Up — Utkarsh National Level Robotics Competition	2024
--	------

Smart Chair Kit Project

- Secured **1st Runner-Up** among national-level participants for the Smart Chair Kit project, recognized for innovation in embedded sensing and real-time data feedback systems.

Finalist & Best Innovation Award — DIPEX State-Level Exhibition	2025
--	------

Smart Chair Kit Project

- Selected as **finalist** and awarded **Best Innovation Award** at DIPEX 2025 (D.Y. Patil Innovation Exhibition) for the Smart Chair Kit project, competing against **100+ teams** across engineering disciplines.

SARA Club Coordinator & Tech Fest Contributor	2023 – 2025
--	-------------

D.Y. Patil College of Engineering, Akurdi

- Served as active coordinator for SARA (Robotics Club), organizing **technical workshops** and hands-on sessions for **50+ junior students** in embedded systems and IoT.
- Active contributor to college Tech Fest — coordinated events, managed logistics, and drove student engagement in technical competitions across **multiple editions**.
