Summary

Data Analyst skilled in **SQL, Python, Power BI, Excel, and AWS**, focused on manufacturing and business analytics. Experienced in EDA, data cleaning, KPI dashboards, reporting automation, anomaly analysis, and datasets exceeding **20,000 records**. Seeking roles in **Data Analytics, Data Science, or Data Engineering**.

Technical Skills

Languages & Querying: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL), C++
BI & Analytics: Power BI, Excel (Pivot Tables, VLOOKUP, dashboards), Jupyter Notebook, EDA, data cleaning/wrangling, statistical and trend analysis, KPI development, correlation analysis, anomaly detection
Cloud & Tools: AWS S3, Glue, Athena, DataBrew, ETL, Git, GitHub, VS Code, Google Colab
Strengths: Analytical problem-solving, data storytelling, cross-functional collaboration

Experience

Data Analyst Jun 2026 – Sep 2026
Autoline Industries Ltd *Pune, Maharashtra*

- Cleaned and analyzed data from **5 departments** – Production, Quality, Maintenance, Requirements, and R&D – resolving nulls and inconsistencies in **Excel/Power BI** and preparing reports and dashboards on operational trends.
- Applied **Kaizen** to production-line workflows, using report/dashboard findings to identify process gaps and recommend changes targeting higher output, less waste, and improved profitability.

Project Management Intern Nov 2025 – Dec 2025
Lumax Cornaglia Auto Technologies Pvt. Ltd. *Pune, Maharashtra*

- Supported the senior project manager by analyzing project workflows, tracking development milestones and deadlines, and preparing status reports on progress and follow-up actions.
- Coordinated with **2 on-site clients** on project development and improvements, clarifying requirements and deadlines and tracking stakeholder follow-ups to support delivery.

Projects

Machine Monitoring Analytics Dashboard | *SQL, Power BI, Excel, Python* GitHub

- Built a Power BI dashboard for M2/M35 sensor data; used **10+ SQL queries** and Python trend, correlation, and anomaly analysis to track OEE/shift performance and reduce manual reporting by **about 40%**.
- Cleaned temperature, vibration, and pressure data with **Pandas and NumPy**, then created KPI cards and time-series views to surface equipment degradation patterns across **2 machine types**.

Airbnb NYC EDA & Market Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn* GitHub

- Analyzed **20,770 listings** across **22 attributes**; cleaned missing values and outliers, validated data types, and performed end-to-end exploratory data analysis.
- Created **15+ visualizations** to examine pricing and availability; identified a Manhattan price premium and observed correlations between beds and price (**r ≈ 0.42**) and reviews (**r ≈ 0.63**).

Zepto SQL Inventory & E-commerce Analytics | *PostgreSQL, Power BI, Excel* GitHub

- Built a SQL analysis workflow for product and inventory data, examining pricing, discounts, stock availability, and category-level performance using **PostgreSQL**.
- Wrote **20+ SQL queries** using aggregations, `CASE WHEN`, `GROUP BY`, and subqueries to answer **15+ business questions**; summarized high-discount SKUs and stock-out patterns in an Excel KPI report.

Education

B.E. Robotics & Automation | CGPA: 8.90/10 Jun 2022 – May 2026
D Y Patil College of Engineering *Akurdi, Pune*

Certifications

Completed Deloitte (Forage) **Data Analytics Job Simulation** in data analysis, forensic technology, and business insights (2025); IBM **Prompt Engineering for Generative AI** covering few-shot prompts and prompt chaining (2024).

Publications & Achievements

- **Publication:** Published research on the Smart Abrasive Monitoring System (SAMS), an ESP32-based predictive-maintenance system using ADXL335 vibration and MLX90614 temperature sensors, at the International Conference on Cybertech and Smart Systems — Paper.
- **Awards:** Utkarsh National Robotics 1st Runner-Up (2024); DIPEX 2025 Best Innovation Award/Finalist (**100+ teams**); SARA Coordinator, technical workshops for **50+ students** (2023–2025).
